Yash Sanjaykumar Patel

Data Analyst

Mississauga, ON | +1 (647) 446-6971 | yashsanjaykumarpatel@gmail.com | linkedin.com/in/yashsp29599/

OBJECTIVE

Analytical and programming geek with active problem-solving skills with the help of modelling algorithms and statistical methods. Wishing to work with a company which can help me to grow and expand my capabilities.

SKILLS

- **Programming Languages:** Python, R, SQL, Java, C, C++, PHP
- **Data Processes:** Data Cleaning
- **Operating System:** Windows, Linux (Ubuntu), Mac OS
- **Tools:** Jupyter Notebook, Jira, GitHub, Spark, Hadoop, Hive, Google Colab
- **Data Visualization Tools:** Power BI, Tableau
- **Basic Data Tools:** Technical proficiency in MS Excel
- **Databases:** SQL, NoSQL
- **Libraries & Frameworks:** Tensorflow, Scikit-Learn, Pandas, Numpy, Matplotlib, Keras, OpenCV, PyTorch, Seaborn, NLTK
- **Analytical Skills:** Regression, Clustering, Feature Selection, Decision Trees, Support Vector Machines, NLP
- **Soft Skills:** Leadership, highly responsible, analytical and logical thinking, multi-tasker, attention to detail, focused, desire to learn and grow
- **Communication:** Ability to convey insights (data-driven decisions) to non-technical audience

WORK EXPERIENCE

AMKAY SOFTWARE SOLUTIONS **Ahmedabad, INDIA**

Machine Learning Engineer Intern *September 2020 – March 2021*

- Created and maintained database for CRM using MySQL in PHPMyAdmin and PHP programming Language as a backend and HTML, CSS and Javascript as a frontend
- Worked with stakeholders to gathered requirements and delivered findings.
- Interpret requirements and present data in a clear and compelling way, using graphical representations and data visualizations.
- Effectively communicated technical outcomes to non-technical audience (client) with visual graphical representations
- Designed new databases to meet organizational needs and objectives
- Gathered and analyzed data from multiple sources to identify trends and patterns in data
- Worked on a machine learning project with the aim to scrape invoice data from invoice images and saved it to a database
- Created interactive dashboards using Power BI to help the company take informed decisions from leads (data)
- Contributed to Data Processing and Modeling, Design and Architecture, Data Quality, Data Management, Governance.

PROJECTS

LIVE COVID-19 DASHBOARD (POWER BI) **Lambton College**

- **Data Sources:** Live global data was used with longitude and latitude coordinates
- **Visualization Tool:** Interactive dashboard in Power BI with geographic visualization
- **Key Feature:** The dashboard provides real-time updates and insights into the global COVID-19 pandemic

SENTIMENT ANALYSIS OF GUN OWNERSHIP WITHOUT A LICENSE **Personal Project**

- **Research Context:** The study analyzed sentiments expressed by citizens regarding the newly enacted gun ownership laws in Indiana, US
- **Data Collection:** Tweets were scrapped from Twitter, both before and after the implementation of the new law
- **Sentiment Analysis Tool:** VADER (Valence Aware Dictionary and Sentiment Reasoner), a Python library, was used to analyze the research
- **Limitations:** VADER had limited ability to recognize emoticons and short-form terminologies
- **Findings:** Before the law was implemented, citizens expressed curiosity and concern, with a majority expressing opposition to the new law. After implementation, citizens showed acceptance of the law change and no significant issues were expressed. The study also analyzed gun crime in Indiana and found an increase, but citizens did not attribute it to the law change.

SOCIAL MEDIA CONTENT ANALYSIS **Personal Project**

- **Data Collection:** Data was manually scrapped from the popular social media platform Instagram
- **Focus:** The study aimed to understand the strategies used by creators to reach their target audience efficiently

EDUCATION

LAMBTON COLLEGE **Mississauga, ON**

Post Graduate Diploma of Big Data Analytics *January 2022 - August 2023*

Relevant Coursework: Big Data Tools, Data Encoding Principles and Collection Methods, Data Warehousing, Big Data Fundamentals, Python Programming, Introduction to Artificial Intelligence, Natural Language Processing, Advanced Python AI and ML Tools, Big Data Algorithms and Statistics, Data Migration, Big Data Visualization for Business Communication (Power BI), Amazon Web Services (AWS), Soft Skills (Communication Skills – verbal and written), Deep Learning and Neural Networks, Project Management for Analytics, Infonomics, Hadoop Ecosystems for Big Data

GUJARAT TECHNOLOGICAL UNIVERSITY **Ahmedabad, INDIA**

Bachelor of Engineering – Information Technology *August 2017 - June 2021*

CERTIFICATIONS

- SQL Essential Training
- Program Databases with Transact-SQL
- Microsoft SQL Server 2019 Essential Training
