YASH SANJAYKUMAR PATEL

yashsanjaykumarpatel@gmail.com | +1 (647) 446-6971 | **LinkedIn:** yashsanjaykumarpatel | **Portfolio:** yashspatel.netlify.app

Skills

Programming Languages: Python, R, SQL, DAX, Scala
Tools & Software: MySQL, PostgreSQL, NoSQL, Tableau, MS Power BI, Hadoop Big Data, Spark, Amazon Web Services (AWS), Azure, MS Server, PowerPoint, Word, MS Advanced Excel (VLOOKUP, Pivot, Power Query), Google Analytics, Snowflake Data Warehousing, Jupyter Notebook, Google Cloud Platform
Proficient Skills: Data Extraction, Data Visualization, Data Structures, RDBMS, Machine Learning, NLP, Project Management, ETL, Data Pipeline, Data Cleaning, Data Modeling, Data Analysis, BI Tools, Data Warehousing, Prompt Engineering
Soft Skills: Analytical, Problem solving, Time management, Decision making, Organizational skills
Certificate: Google Data Analytics Professional (Certified)

Experience

Enkiube Technologies Inc. | Data Scientist (Intern) | Toronto, ON — May 2023 – Aug 2023

- Managed 5000+ image annotations via Label Studio, increasing data quality for model training by 60% through streamlined data labelling processes
- Built and trained machine learning models using advanced statistics, augmenting business decisions by 30%
- Developed 20+ Python features, optimizing app efficiency by 50% through strategic programming based on project needs
- Incorporated LLMs into project, enhancing AI capabilities and text generation accuracy by 40%
- Contributed to critical project discussions, improving workflow planning through feasibility analysis and innovative problem-solving
- Contributed to team brainstorming, fostering data-driven strategies through innovative idea sharing with data scientists and engineers
- Aided in managing projects concurrently, meeting all deadlines through meticulous organization and time management

Amkay Software Solutions | Machine Learning Engineer (Intern) | Ahmedabad, India — Sept 2020 - Mar 2021

- Undertook leadership role in CRM development, strategically optimizing project management efficiency through a smart task delegation strategy
- Built the CRM's robust back end, precisely aligning database design with intricate requirements of project
- Designed a four-tier user accessibility system embedded in the CRM, markedly improving task distribution and tracking efficiency by about 30%
- Optimized system to competently handle diverse tasks based on distinct user roles, resulting in a notable 25% boost in project completion rates
- Incorporated a project cost visualization feature into the CRM, decisively improving financial management accuracy by 20%
- Led a key project, using machine learning to automate invoice data extraction, enhancing efficiency by 45% and reducing errors by 30%
- Designed a system for integrating invoice data into existing database, increasing data accuracy and usability by 40%
- Utilized OCR technology to handle varied invoice formats, aiding development of a versatile data processing system
- Fostered a collaborative culture in a cross-functional team, promoting shared problem-solving and leading to early project completion

Projects

Reddit Sentiment Tracker (ETL): Data Engineering Project (AWS, Power BI)

- Orchestrated the end-to-end real-time Reddit Sentiment Tracker for Canadian Politics using AWS Lambda, ETL, and NLTK for sentiment analysis
- Implemented continuous data flow for real-time insights, utilizing ETL principles to extract, transform, and load data seamlessly
- Showcased KPIs and sentiment trends, improving accessibility to sentiment analysis results
- Leveraged advanced technologies including AWS S3, Athena, and PowerBI for efficient data storage, analysis, and visualization
- **GitHub Link:** https://github.com/yashspatel/canadian-politics-sentiment-analysis

Global COVID-19 Impact Visualizer: PowerBI Project

- Utilized global data and Power BI to present key insights such as total confirmed cases, deaths, recoveries, and affected countries
- Integrated data tables showcasing active cases and provided a running tab for comprehensive information
- Utilized size-indicative markers to represent active cases in various regions for quick understanding
- Highlighted the system's ability to delve into country-specific details, showcasing versatility
- Made complex epidemiological data accessible and understandable for a wide range of users
- **GitHub Link:** https://github.com/yashspatel/Global-Covid-19-Impact-Visualizer

Netflix Trend Dashboard: Tableau Project

- Used Tableau to analyze 6,000+ rows of data, visualizing movie and TV show trends by country, release year, genre, and rating
- Implemented bar charts, maps, and bubble charts to effectively communicate insights and identify key patterns in the vast dataset
- Enabled users to explore specific movie and TV show characteristics, including release date, duration, and cast, for a tailored viewing experience
- Incorporated the Netflix color scheme to create a visually appealing and branded presentation, improving dashboard aesthetics and storytelling

Education

Lambton College, Mississauga — January 2022 - August 2023

- *Post Graduation Diploma of Big Data Analytics* | GPA: 3.65 | Mississauga, ON

Gujarat Technological University — June 2017 - May 2021

- *Bachelor of Engineering in Information Technology* | GPA: 3.9 | Gujarat, India

Volunteer Work

- Contributed as a volunteer for Community Cleanup and celebrated Earth Day, organized by MPP Deepak Anand.
