YASH SANJAYKUMAR PATEL

yashsanjaykumarpatel@gmail.com | (647) 446-6971 | **LinkedIn:** yashsanjaykumarpatel | **Portfolio:** yashspatel.netlify.app

Education

Lambton College, Mississauga January 2022 - August 2023

- *Post Graduation Diploma of Big Data Analytics* | GPA: 3.65 | Mississauga, ON

Gujarat Technological University June 2017 - May 2021

- *Bachelor of Engineering in Information Technology* | GPA: 3.9 | Gujarat, India

Skills

Python, R, Java, SQL, C++, C, HTML/CSS, JavaScript, Scala, DAX, Power Query, DBMS, MySQL, PostgreSQL, NoSQL, Microsoft Office(Power Point, Word, Excel), MS Access, Git, GitHub, Tableau, MS Power BI, SAS, SAP, Hadoop, Spark, Clustering, Feature Selection, Decision Tree, Support Vector Machine, Bayes Net, NLP, Multivariable Regression, Neutral Networks, Presentation Skills, Communications Skills, Project Management

Experience

Enkiube Technologies Inc. | Data Scientist (Intern) | Toronto, ON May 2023 - Present

- Managed 5000+ image annotations via Label Studio, boosting data quality for model training by 60% through streamlined data labeling processes
- Built and trained machine learning models using advanced statistics, enhancing business decisions by 30%
- Developed 20+ Python features, boosting app efficiency by 50% through strategic programming based on project needs
- Incorporated LLMs into the project, improving AI capabilities and text generation accuracy by 40%
- Contributed to critical project discussions, enhancing workflow planning through feasibility analysis and innovative problem-solving
- Contributed to team brainstorming, boosting data-driven strategies through innovative idea sharing with data scientists and engineers
- Aided in managing projects concurrently, meeting all deadlines through meticulous organization and time management

Amkay Software Solutions | Machine Learning Engineer (Intern) | Ahmedabad, India Sept 2020 - Mar 2021

- Undertook the leadership role in CRM development, strategically enhancing project management efficiency through a smart task delegation strategy
- Built the CRM's robust back end, precisely aligning the database design with the intricate requirements of the project
- Designed a four-tier user accessibility system embedded in the CRM, markedly improving task distribution and tracking efficiency by about 30%
- Optimized the system to competently handle diverse tasks based on distinct user roles, resulting in a notable 25% boost in project completion rates
- Successfully incorporated a project cost visualization feature into the CRM, decisively improving financial management accuracy by 20%
- Led a key project, using machine learning to automate invoice data extraction, enhancing efficiency by 45% and reducing errors by 30%
- Designed a system for integrating invoice data into existing database, increasing data accuracy and usability by 40%
- Utilized OCR technology to handle varied invoice formats, aiding the development of a versatile data processing system
- Fostered a collaborative culture in a cross-functional team, promoting shared problem-solving and leading to early project completion

Projects

Weed Detection: Instance Segmentation Project

- Used **YOLOv8** instance segmentation to detect and segment weeds, contributing to enhanced crop yield and reduced herbicide usage for farmers
- Gathered and preprocessed 1,008 diverse agricultural images for training and evaluation of weed detection model
- Employed **TensorFlow** and **PyTorch** to fine-tune the YOLOv8 model, significantly improving its weed detection accuracy **from 36% to 77%**
- Created a user-friendly interface enabling farmers to upload images/videos and visualize the results of weed detection
- Documented project methodology, implementation details, and results for future reference and replication
- **GitHub Link:** https://github.com/yashspatel/WeedDetection-Using-YOLOv8-Instance-Segmentation

Sentiment Analysis of Gun Ownership without a license: NLP Project

- Applied Vader, a **Natural Language Processing** (NLP) approach, to perform sentiment analysis on Twitter posts from individuals in Indiana, United States, to understand their opinions and emotions regarding the recently implemented legislation on gun ownership
- Conducted a comprehensive two-phase examination, analyzing sentiments before and after the law's commencement
- Identified, **70% increase** in negative sentiment among individuals following the implementation of gun ownership law

Global COVID-19 Impact Visualizer: PowerBI Project

- Developed an in-depth COVID-19 dashboard using global data and **Power BI**, including comprehensive insights such as total confirmed cases, total deaths, total recovered cases, and the number of affected countries
- Included detailed country-specific data tables showing active cases and a running tab presenting similar information
- Incorporated a visually compelling graph in the center of the dashboard, using size-indicative markers to represent active cases in various regions
- Demonstrated the dashboard's functionality through a focus on India, highlighting the system's ability to delve into country-specific details
- Crafted a user-friendly interface, making complex epidemiological data accessible and understandable to a wide range of users
- **GitHub Link:** https://github.com/yashspatel/Global-Covid-19-Impact-Visualizer

Other Projects provided upon request (or please visit portfolio)

Certifications

- Google Data Analytics June 2023

Other Certificates provided upon request

Volunteer Work

- Contributed as a volunteer for Community Cleanup and celebrated Earth Day, organized by MPP Deepak Anand.
